

WAREHOUSE MANAGEMENT SYSTEM & IT SOLUTION

JSL Global Information Systems is Cloud-hosted, and Web based ERP solution effectively used to plan, monitor, execute and control the end-to-end of a Supply Chain

- 🚢 **End to End visibility** enables to monitor & manage inventory and shipments from the manufacturing unit, in transit and up to the distribution center or destination.
- 🚢 **JSL cloud-hosted web-based system** provides the cutting edge to track real time inventory and updates on the go even by using an android enabled smartphone.

- 🚢 The advanced applications manage all warehousing processes, including receiving, put away, replenishment, picking, packing, labeling, kitting, de-kitting and shipping.
- 🚢 Easy and fast access to data with nil downtime improves planning and increases control across the supply chain

- 📍 GPS & CARGO MAPPING
- 📍 REAL TIME SHIPMENT TRACKING
- 📍 ONLINE CUSTOMER PORTAL

REAL-TIME SHIPMENT VISIBILITY

The optimization in supply chain of large-scale e-commerce companies has set the bar for super-high expectations of purchasing, shipping, and delivery. And this is true for both business and consumers.

JSL provides the real time information that you need to keep up with providing excellent customer experience and to ensure your logistics and supply chain operate at peak efficiency.
